Behavior Frequency Record and Graph (Sample)

Student   _Jay Jones_   Teacher   _Brown_

Behavior Pinpoint: _Throws object (spoon, tray, etc.) That could cause injury or throws food or drink onto other person_ _____

_____

Observation Period (time of day/activity): _____

Baseline			Reduce Noise				Reduce Noise and Visual					
Note baseline or type of intervention in the gray space above.												

Frequency of Behavior (vertical axis, values 0–25 in each column)

Directions:
- For **BEHAVIOR PINPOINT**: Clearly state when the event starts and ends.
- Choose an **OBSERVATION PERIOD** most appropriate to the behavior i.e.,
  - a short directed lesson for frequent behaviors (such as calling out)
  - an hour or full morning for less for less frequent behaviors (like fighting)

  Use the same observation period each day.
- Get a **BASELINE** (usually recommended): A minimum of three to five days of charting should be conducted **_before_** any intervention is implemented.
- To **RECORD**: Work upward from the bottom of the column each day, marking or circling one number each time the target behavior occurs during the observation period.
- To **GRAPH PROGRESS**: Use a line to connect the highest marked number across the columns.
